Multi-Flex

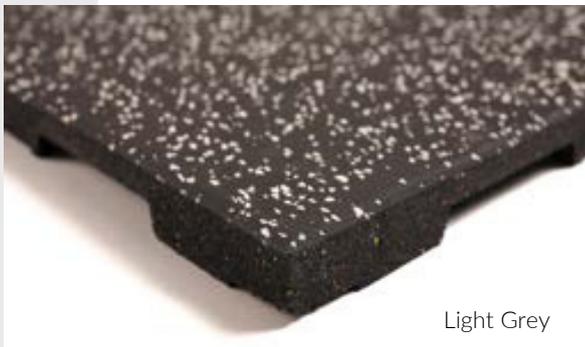

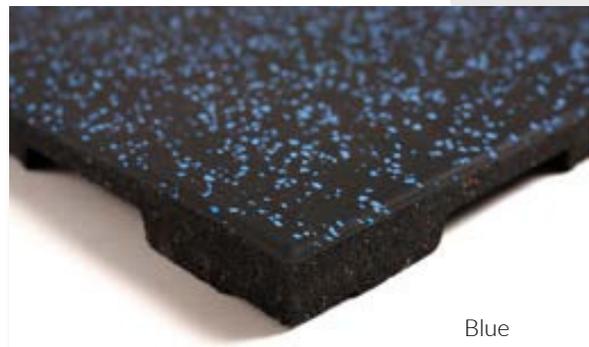

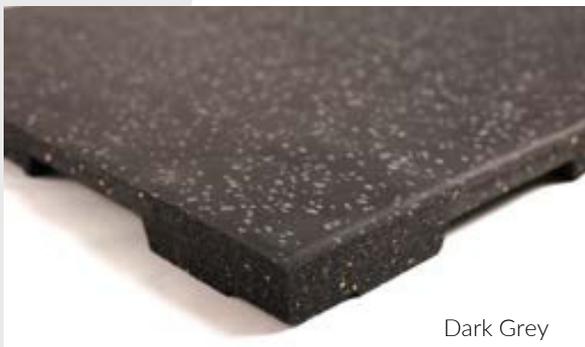

Interlocking Range 20/30/40/70

ECO-TEK's Multi-Flex interlocking premium rubber tiles are perfectly suited for fitness suites and commercial gyms with weight training and CrossFit areas. The tiles are designed and engineered to be easily and quickly installed, providing clients with maximum comfort, durability and functionality.

Our Multi-Flex tiles provide a premium bevelled edge with interlocking connection and a smooth, easy to clean, surface. The tiles also offer exceptional resilience and comfort and can be complemented with straight edge ramps.

Colour Chart

Multi-Flex is available in the below standard fleck colours.

Multi-Flex 20

- Tile Thickness: 20mm
- Tile Dimensions: 500mm x 500mm

Multi-Flex 40

- Tile Thickness: 40mm
- Tile Dimensions: 500mm x 500mm

Multi-Flex 30

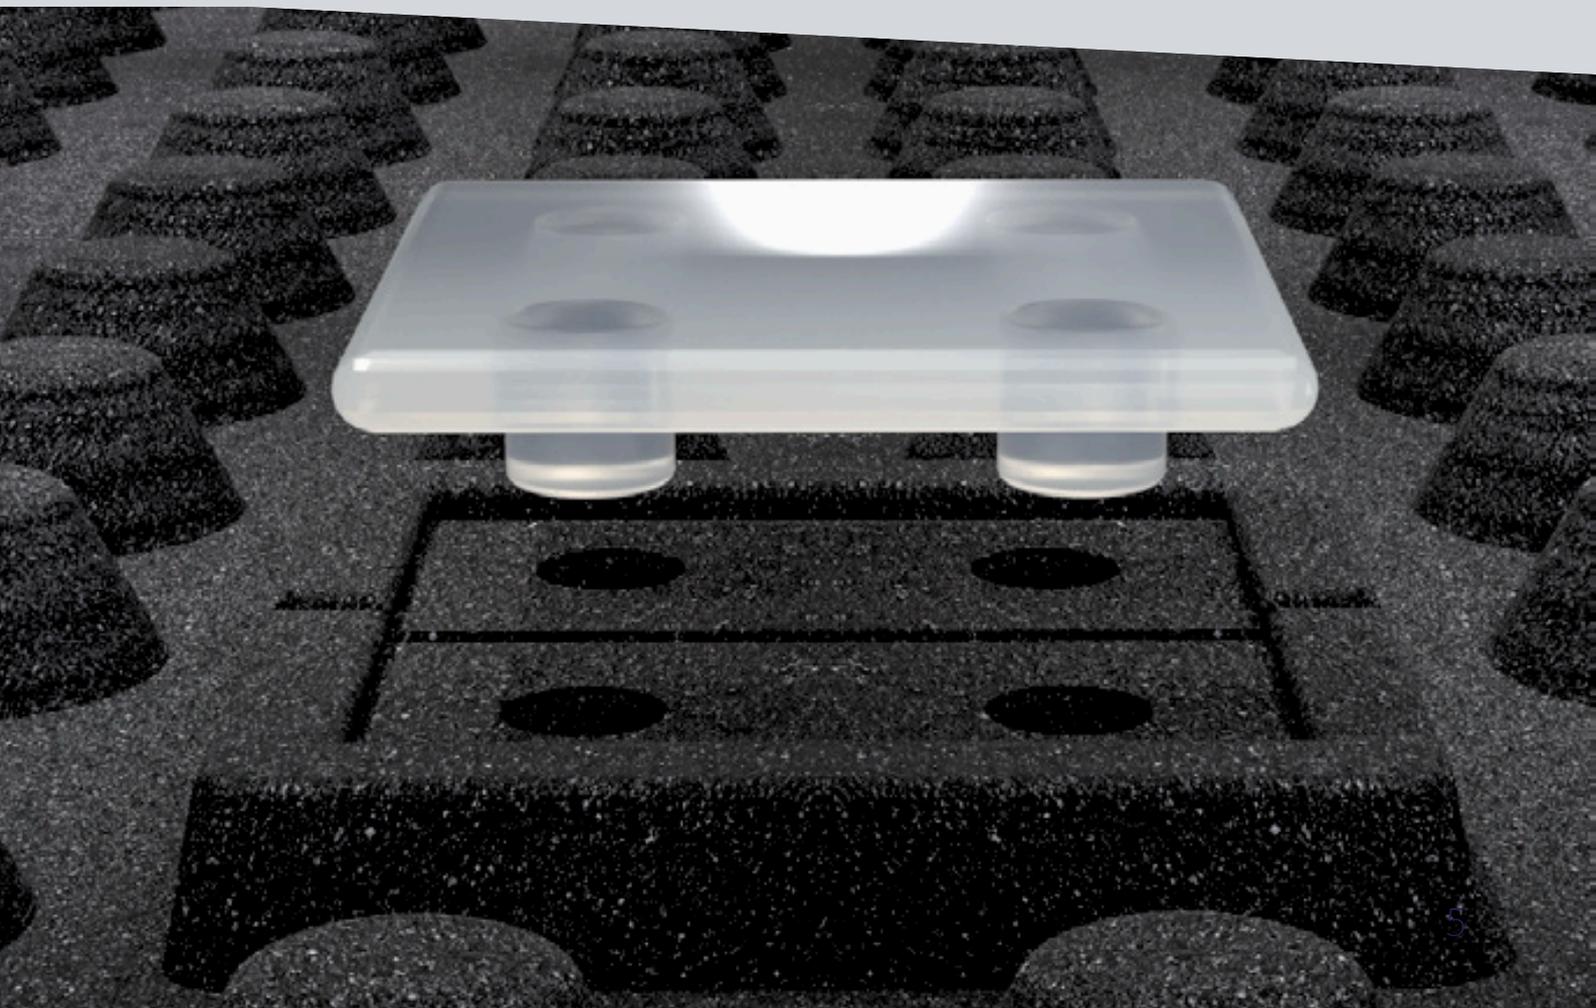

- Tile Thickness: 30mm
- Tile Dimensions: 500mm x 500mm

Multi-Flex 70

- Tile Thickness: 70mm
- Tile Dimensions: 500mm x 500mm

Multi-Flex Benefits

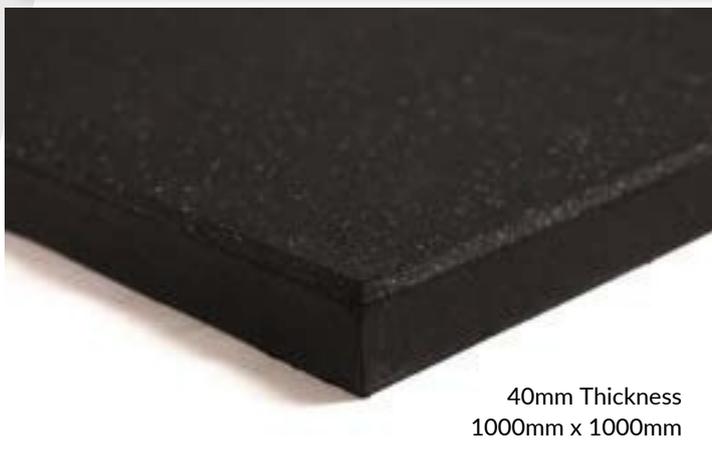

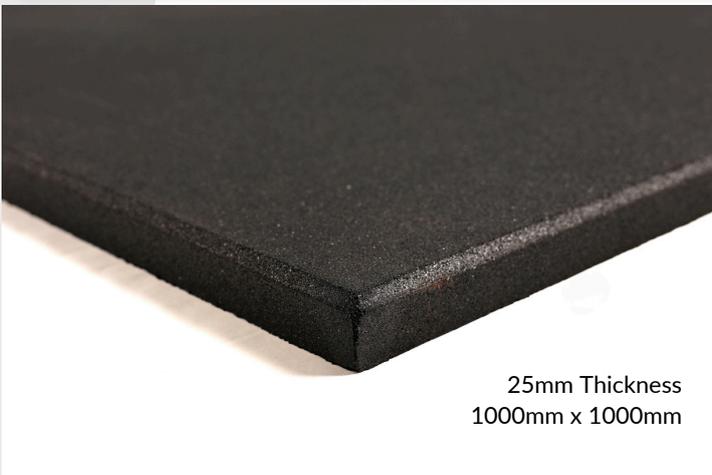

- ✓ Eco-friendly - recycled rubber
- ✓ Superior sound and shock absorption
- ✓ Flexible systems allows easy re-purposing of areas
- ✓ Smooth, easy-to-clean surface
- ✓ No adhesive contamination of the subfloor
- ✓ High levels of user comfort

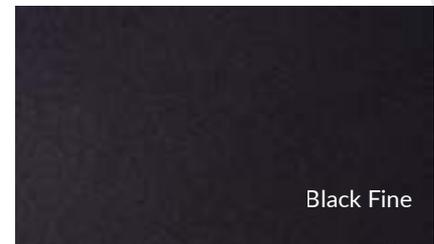

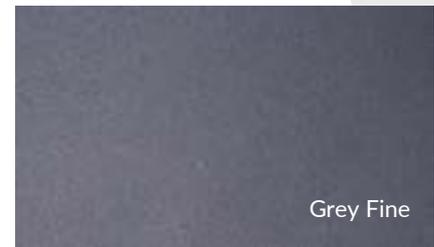

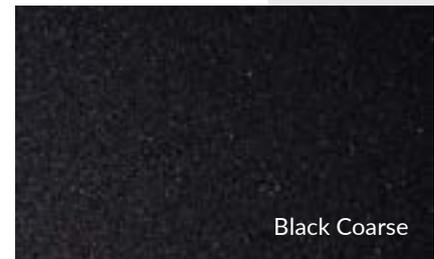

ECO-Flex GT 15/25/40

Product Range

Colour Chart

ECO-Flex GT Range Benefits

- ✓ 15mm and 25mm tiles - suitable for free weights, and cross-fit areas. High durability, excellent shock absorption and impact sound isolation
- ✓ Can be combined with our Shock Pad (SP) range
- ✓ 40mm tiles - designed for heavy weight lifting areas. High shock absorption helps protect subfloors from barbell weight-lifting and offers increased levels of impact sound insulation
- ✓ Provides a safe exercise platform

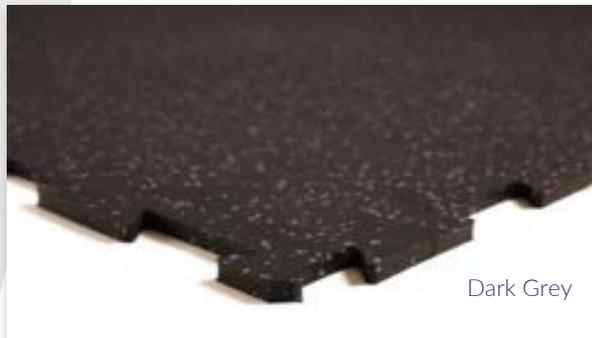

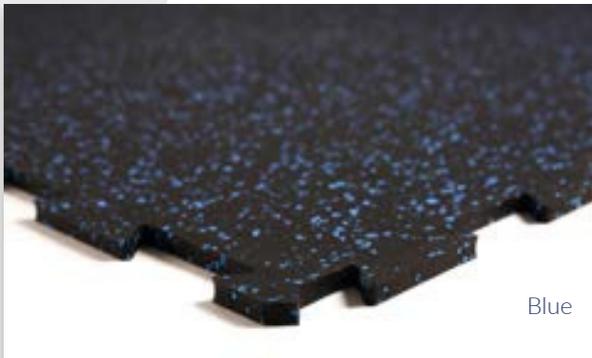

Zone-Flex 8/10

Jigsaw Interlocking Rubber Tiles

The ECO-TEK Zone-Flex premium jigsaw interlocking tiles are perfectly suited where impact resistance, vibration and noise control are required within fitness, gym and training facilities. Zone-Flex is designed and engineered to be easy to clean and to maximise durability, functionality and visual appearance. This product is an excellent choice for functional, multi-use zones, which require a loose-laid, adhesive-free tile, perfect for temporary or permanent installations. These tiles can also be complemented with edging strips for a smoother look and cleaner finish.

Colour Chart

Zone-Flex is available in the following standard fleck colours.

Zone-Flex 8

Tile Thickness: 8mm

Tile Dimensions: 1000mm x 1000mm

Tile Coverage: 0.96 sqm

Zone-Flex 10

Tile Thickness: 10mm

Tile Dimensions: 1000mm x 1000mm

Tile Coverage: 0.96 sqm

Zone-Flex Benefits

- ✓ Close-fitting interlocking design
- ✓ Good grip with sure-footing
- ✓ Attractive coloured EPDM fleck surface
- ✓ High indentation resistance
- ✓ Smooth, easy-to clean surface
- ✓ Adhesive-free, quick installation

| Shock Pad 15/30

Product Range

SP15/30 shock pad products have been developed to provide effective impact absorption from dropping free weights and to improve impact sound insulation. Can be used as a shock pad below other ranges.

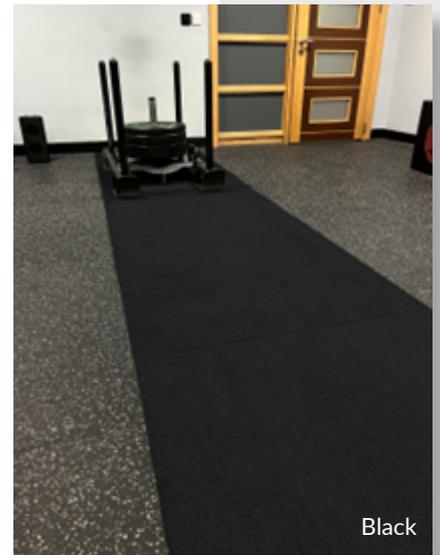

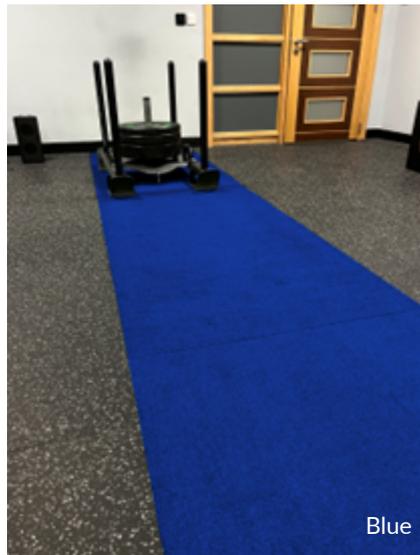

Shock Pad Benefits

- ✓ Enhances sub-base protection
- ✓ Impact absorption
- ✓ Comfort & performance
- ✓ Improved acoustic performance

Sled Track

Sled tracks support a variety of strength, speed, and endurance exercises, including sled pulls, functional training, plyometrics, and HIIT. With an interlocking adhesive-free design and the ability to be easily moved or adjusted, our sled tracks offer a durable and flexible solution for any gym looking to adapt to evolving fitness trends.
